Privacy Policy – SunRay for Garmin devices

Provider: CS Vision GmbH, Untere Betliserstrasse 12, CH-8872 Betlis, Switzerland

1. Overview

SunRay for Garmin shows when the sun shines at a place, taking mountains and terrain into account. To do this, the app loads the sun and shadow data for the selected place from the SunRay server (sunray.global). The app does not use a user account, advertising, or any analytics or tracking services.

2. What data does the app transmit?

Only when you load data (on first start, when refreshing or when selecting a place), the app sends the following to the SunRay server:

- **Coordinates of the place:** latitude and longitude of your location (GPS) or of the place selected on the map or from your favorites.
- **Device identifier:** an identifier assigned by Garmin that applies only to SunRay on this device. It contains no name and no Garmin account data.
- **Device type:** the model number of the device (e.g. fēnix 8).
- **System language** of the device.
- **Technical data** that arises with every internet connection, in particular the IP address of the connection (usually that of your phone).

The app does not determine your location in the background and does not send it continuously, only when data is loaded.

3. Purpose and retention

- **Coordinates:** used only to calculate the sun and shadow data. They are not stored.
- **Device identifier, device type and language:** used to count active installations and for statistics on device types and languages. They are stored without coordinates. If no new request is received from a device within 12 months, its entry is deleted.

Data is not sold and not shared for advertising purposes.

4. Data on the device

On your device, the app stores the loaded yearly data, the last loaded place and your favorites (name and coordinates). This data remains on the device and is deleted when the app is removed.

5. Disclosure to third parties

- **Hosting:** the SunRay server is operated by Infomaniak in Switzerland, which processes the data on our behalf.
- **Garmin:** installation, updates and the internet connection of the device via the Garmin Connect app are handled by Garmin. Garmin's privacy policy applies to this.

Beyond this, we do not disclose any data to third parties.

6. Your rights

Under the Swiss Federal Act on Data Protection (FADP) and, where applicable, the EU General Data Protection Regulation (GDPR), you have the right to access, rectification and erasure of your data. Because the app works without a user account, we can only attribute data to a person via the device identifier. Please contact us at the address in section 8.

You can stop the transmission at any time by no longer loading data or by removing the app.

7. Changes

If the functionality of the app changes, we will update this policy. The version published here applies.
